## Associate in Science

# Fire Science Program – Emergency Medical Services Option

---

**Overview:** This program is designed to expand the educational development of the Emergency Medical Services. Material covered in this program will expand the skill and education of persons working in the field or in administrative areas of Emergency Medical Services.

**Career Outlook:** This program is designed to provide professional training for students interested in careers in the Emergency Medical Services field with opportunities in municipal, state, and federal agencies, industry, insurance companies, hospitals and various medical offices.

**Program Outcomes:** Upon completion of the Fire Science program- Emergency Medical Services option, students will be able to meet the following learning outcomes:

- apply principles and current practices of fire protection techniques
- use effective communication skills to build relationships with co-workers, supervisors, and members of the community
- perform the role of a fire protection officer using established standards, guidelines, and regulations
- observe, analyze, assess, and implement an effective operation plan in fire protection and emergency medical service situations
- apply principles and practices of specialized technical operations teams
- integrate leadership principles to perform roles of increasing responsibility within fire protection and emergency medical service organizations.
