ECE 211 Teaching Math and Science

- To set up an environment for intellectual curiosity
- Wonder and amazement are the keys to learning
- Fun ways to get through to children
- New-found respect for math and science
- All of the hands-on activities we all shared

- To do more challenging projects with the children
- Curriculum can just be a collection, just watch and see what the children will do

- It is easy to incorporate science and math into the room
- How fun science is and how it relates to our daily life
- How easy math is

- Science and math are not only fun, but can be brought into every day life
- How to incorporate math and science in an interesting, stimulating, and beautiful way
- I really learned a lot from other classmates

- Teaching math and science doesn't mean you have to be an expert
- The NASA website has so much information

- To have confidence in knowing that I have given children a desire for science
- Some of the math I never thought they needed right now

- Not to be scared or nervous in front of the children
- Not everything goes as planned

- How to be more creative
- How to do better projects with the children
- The children's behavior was better when they had math and science in the curriculum
- How to incorporate math and science into my curriculum without feeling overwhelmed
